straBe

Create meaningful touchpoints for our daily journeys

The world's cities are growing, and people are living closer to each other than ever before. At StraBe, we help create urban places where people slow down to engage and connect. Making it attractive to get outdoors to move and interact. Reconnect with nature and places. Meet friends. Be a part of the community.

Design everything

As cities keep growing, living conditions are becoming more urbanised. To us, this means that urban streetscapes & landscape design must encompass much more than pure aesthetics. We collaborate with renowned Australian & Danish designers, and it is equally important for our products to look good, serve a practical function, connect with time and place, and cause the least possible impact on the environment.

Local people, local production

StraBe is a family-owned Australian company providing ergonomic & stylish Urban Furniture & Shelters to meet the growing needs of our diverse nation. With a sound commitment to providing the best solution for every urban landscape application, StraBe offers professional product design through to complete manufacture, material selection, quality control and installation on your project.

Over the years, we have built a reputation as a trusted partner for distinctive urban and public infrastructure projects. We work closely with local Councils, Architects, Landscapers, Retail Groups, Construction Companies and Property Developers to specify and furnish local community urban spaces, parks, plazas, schools & corporate courtyards across the country - including some of Australia's most prestigious public domain projects.
